NOTIFICATION OF TRANSMITTAL OF INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Rule 71.1)

Date of Mailing
(day/month/year)

07 MAR 2001

Applicant's or agent's file reference
213/219-PCT2

IMPORTANT NOTIFICATION

International application No.
PCT/US99/24920

International filing date (day/month/year)
21 OCTOBER 1999

Priority Date (day/month/year)
23 OCTOBER 1998

Applicant
FLUOR CORPORATION

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

Applicant FLUOR CORPORATION		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
2. This REPORT consists of a total of 5 sheets.

☒ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority. (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of 2 sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of report with regard to novelty, inventive step or industrial applicability
- IV ☒ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Facsimile No. (703) 305-3230	Telephone No. (703) 308-1868

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/US99/24920

I. Basis of the report**1. With regard to the elements of the international application:***☐ the international application as originally filed☒ the description:

pages (See Attached) _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____

☒ the claims:

pages (See Attached) _____, as originally filed
pages _____, as amended (together with any statement) under Article 19
pages _____, filed with the demand
pages _____, filed with the letter of _____

☒ the drawings:

pages (See Attached) _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____

☒ the sequence listing part of the description:

pages (See Attached) _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language _____ which is:

☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).☐ the language of publication of the international application (under Rule 48.3(b)).☐ the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).**3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:**☐ contained in the international application in printed form.☐ filed together with the international application in computer readable form.☐ furnished subsequently to this Authority in written form.☐ furnished subsequently to this Authority in computer readable form.☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.**4. ☒ The amendments have resulted in the cancellation of:**☒ the description, pages NONE☒ the claims, Nos. NONE☒ the drawings, sheets/fig. NONE**5. ☐ This report has been drawn as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).****

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

**Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

IV. Lack of unity of invention

1. In response to the invitation to restrict or pay additional fees the applicant has:

- ☐ restricted the claims.
☐ paid additional fees.
☒ paid additional fees under protest.
☐ neither restricted nor paid additional fees.

2. ☐ This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68, not to invite the applicant to restrict or pay additional fees.

3. This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is

- ☐ complied with.
☒ not complied with for the following reasons:

As applicant was previously notified this International Preliminary Examining Authority has found plural inventions claimed in the International Application covered by the claims indicated below:

Group I, claim(s) 1-21, drawn to a bubble cap and a mixing apparatus with bubble cap.

Group II, claim(s) 22-30, drawn to a mixing apparatus with beam support but without bubble cap.

and it considers that the International Application does not comply with the requirements of unity of invention (Rules 13.1, 13.2 and 13.3) for the reasons indicated below:

The inventions listed as Groups I and II do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of the Group I invention is a bubble cap with riser vanes while the special technical feature of the Group II invention is outwardly extending support beams. Because the special technical feature of the Group I invention is not present in the Group II claims and because the special technical feature of the Group II invention is not present in the Group I claims, unity of invention is lacking.

4. Consequently, the following parts of the international application were the subject of international preliminary examination in establishing this report:

- ☒ all parts.
☐ the parts relating to claims Nos. ..

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. statement**

Novelty (N)	Claims <u>1-30</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-30</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-30</u>	YES
	Claims <u>NONE</u>	NO

2. citations and explanations (Rule 70.7)

Claims 1-21 and 28 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest a distribution tray fitted with a plurality of bubble caps having riser vanes spaced apart from each other to define a plurality of vane passageways wherein the riser vanes are defined by the specification as vanes located above the bubble cap riser and below the cap of the bubble cap.

Claims 22-27 and 29-30 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest a mixing apparatus comprising a collecting stage that combines a gas phase fluid and a liquid phase fluid to form a mixed phase fluid; a swirl chamber with an outlet downstream of the collecting stage; a distribution tray in fluid communication with and downstream of the outlet; and a plurality of outwardly extending beams that support the mixing apparatus.

Claims 1-30 have industrial applicability because the mixing apparatuses and bubble caps can be used in catalytic industries.

PCT/US 99/24920
2009
1PEA/US 30 JAN 2001

Attorney Docket: 213/219-PCT2

12. The mixing apparatus of claim 11 in which the wall is fitted with a plurality of wall baffles, and further comprising a collection tray having a plurality of floor baffles fluidly communicating with, and upstream of the plurality of openings.
13. The mixing apparatus of claim 1 wherein the fluid guides are also radial support beams that support the swirl chamber.
14. The mixing apparatus of claim 1 further comprising a splash plate fluidly interposed between the outlet of the swirl chamber and the distribution network.
15. A multizoned vessel having a mixing apparatus according to claim 1 fluidly interposed between a first reaction zone and a second reaction zone.
16. A bubble cap comprising a riser, a cap, and a plurality of riser vanes.
17. The bubble cap of claim 16 wherein the riser is disposed upstream of the plurality of riser vanes, and the cap is disposed downstream of the plurality of riser vanes, relative to a fluid flowing through the bubble cap.
18. The bubble cap of claim 16 wherein the plurality of riser vanes are spaced from each other to define a plurality of vane passageways.
19. The bubble cap of claim 16 wherein the riser vanes are flat, curved, or cut at an angle.
20. A mixing apparatus comprising a distribution zone that includes the bubble cap according to claim 16.
21. A mixing apparatus comprising a distribution zone that includes the bubble cap according to claim 18.
22. A mixing apparatus comprising:
 - a collecting stage that combines a substantial gas phase fluid and a substantial liquid phase fluid to form a mixed phase fluid;
 - a swirl chamber downstream of the collecting stage that swirls the mixed phase fluid wherein the swirl chamber has an outlet;
 - a distribution tray in fluid communication with, and downstream of the outlet; and
 - a plurality of outwardly extending beams that physically supports the mixing apparatus.
23. The mixing apparatus of claim 22 wherein the outwardly extending beams support the distribution tray.
24. The mixing apparatus of claim 22 wherein the outwardly extending beams support the swirl chamber.

PCT/US99/24920
1PEA/US 30 JAN 2001

Attorney Docket: 213/219-PCT2

25. The mixing apparatus of claim 22 wherein the outwardly extending beams extend radially from a hub.
26. The mixing apparatus of claim 22 in which the swirl chamber is disposed to receive a material from a plurality of openings, each of which is fitted with a member that at least partially directs the material in a swirling motion.
27. The mixing apparatus of claim 22 in which the swirl chamber is disposed to receive a material from a plurality of openings, each of which is fitted with a ramp sloping downward in a direction of flow into the swirl chamber.
28. The mixing apparatus of claim 22 wherein the distribution tray is fitted with a plurality of bubble caps having riser vanes spaced apart from each other to define a plurality of vane passageways.
29. The mixing apparatus of claim 22 in which the swirl chamber has a wall that includes a plurality of openings that receive and impart to the material a swirling force, and a ramp sloping downward in a direction of flow into the swirl chamber.
30. The mixing apparatus of claim 29 in which the wall is fitted with a plurality of wall baffles, and further comprising a collection tray having a plurality of floor baffles fluidly communicating with, and upstream of the plurality of openings.
